

**INDEX OF ATTACHMENTS TO SUPPORT ENVIRONMENTAL JUSTICE  
MANDATE NEEDED TO REQUIRE MORE STRINGENT CONTROLS ON FLY  
ASH**

- 1.....Copy of AACCE testimony
- 2....Copy of Definition of Environmental Justice
- 3....Copy of map on major particulate matter sources in impact area
- 4....Copy of 2009 Emissions in "zoned area"
- 5....Copy of 1098 list of 27 industries reflecting areas outside of 21226  
  
(Note) each number circled identify industries on particulate map
- 6....Copy of our letter to Governor O'Malley requesting decision to wait for EPA's re classification on fly ash.
- 7....History of Community activities that began in 1979 through 2000, and continue. The Communities of Brooklyn, Brooklyn Park, Curtis Bay, Glen Burnie, Pasadena, Marley Neck area (see large Map) were brought together to fight these polluting industries.  
  
Note this does not include the oil refinery that wanted to locate in Marley Neck. We, along with many others prevented an oil refinery from locating on shores of Marley Creek.

# Anne Arundel County Council for the Environment

103 Water Fountain Ct.  
Unit 103  
Glen Burnie MD21060

August 30, 2010

Dear EPA Director,

I am here today to represent The Anne Arundel Council for the Environment. Our group is a dedicated group of community activists. We all live in the shadows, of : a Major Power Plant, plus many industries such as, the largest medical waste incinerator in the nation, Millennium chemical , WR Grace.Landfill,also The Browning Ferris Hazardous waste landfill off Solley Road and compost facility, and Baltimore City dump .on Ordnance Road . And 25 other polluting industries. We have managed to stop BGE from using anhydrous ammonia at their plant, but we were not successful when we tried to convince our then County Council to prohibit BGE from using fly ash as a structural fill. The Solley Road residents suffered greatly from the air pollution from the fly ash. In fact one resident who had an orchard found his apples were permeated though with fly ash.

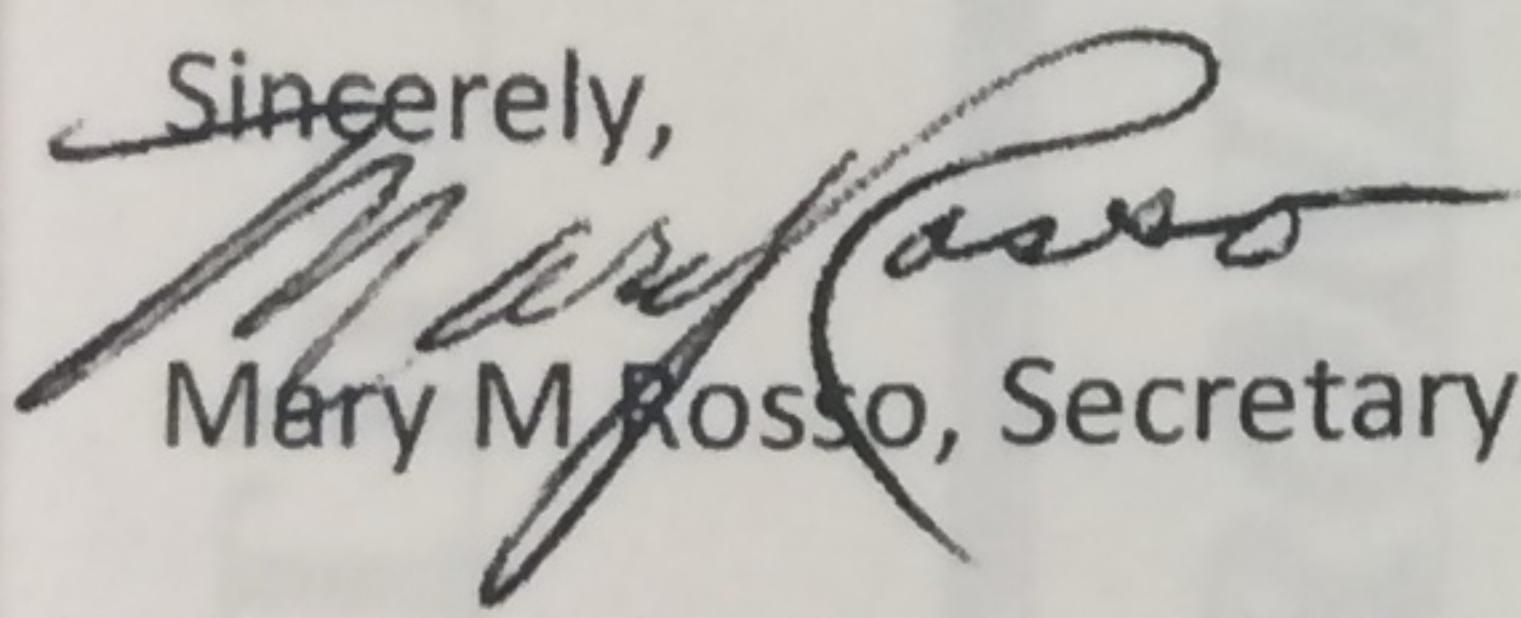

A special group was formed called CAFA, The Coalition Against Fly Ash

I am here today to plead with you to stand up for the poor people who were told that fly ash is harmless. In fact , B G E stated that lie at every community meeting we attended..

We must set a higher standard for any disposal of toxic fly ash. I have a packet that shows the 27 industries located in a 3 mile radius who have the highest concentration of all pollutants.

I am concerned that a lower classification such as "Special Waste" is opening a door for a special Power Plant to reduce their costs. However, the people will bear the burden of the results for "money's sake. Environmental Justice cries out to please give us the Justice and healthier life we deserve.

Sincerely,

Mary M. Rosso, Secretary, Spokeswomen for AACCE

## The Definition of Environmental Justice

**ENVIRONMENTAL JUSTICE** is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, culture, education, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. *Fair Treatment* means that no group of people, including racial, ethnic, or socioeconomic groups, should bear a disproportionate share of the negative environmental consequences resulting from industrial, municipal, and commercial operations or the execution of federal, state, local, and tribal environmental programs, and policies.

# Anne Arundel County Council for the Environment

103 Water Fountain Ct.

Unit 103

Glen Burnie MD21060

Governor Martin O'Malley  
State House  
Annapolis, MD 21401

Honorable Governor Martin O'Malley

Dear Governor,

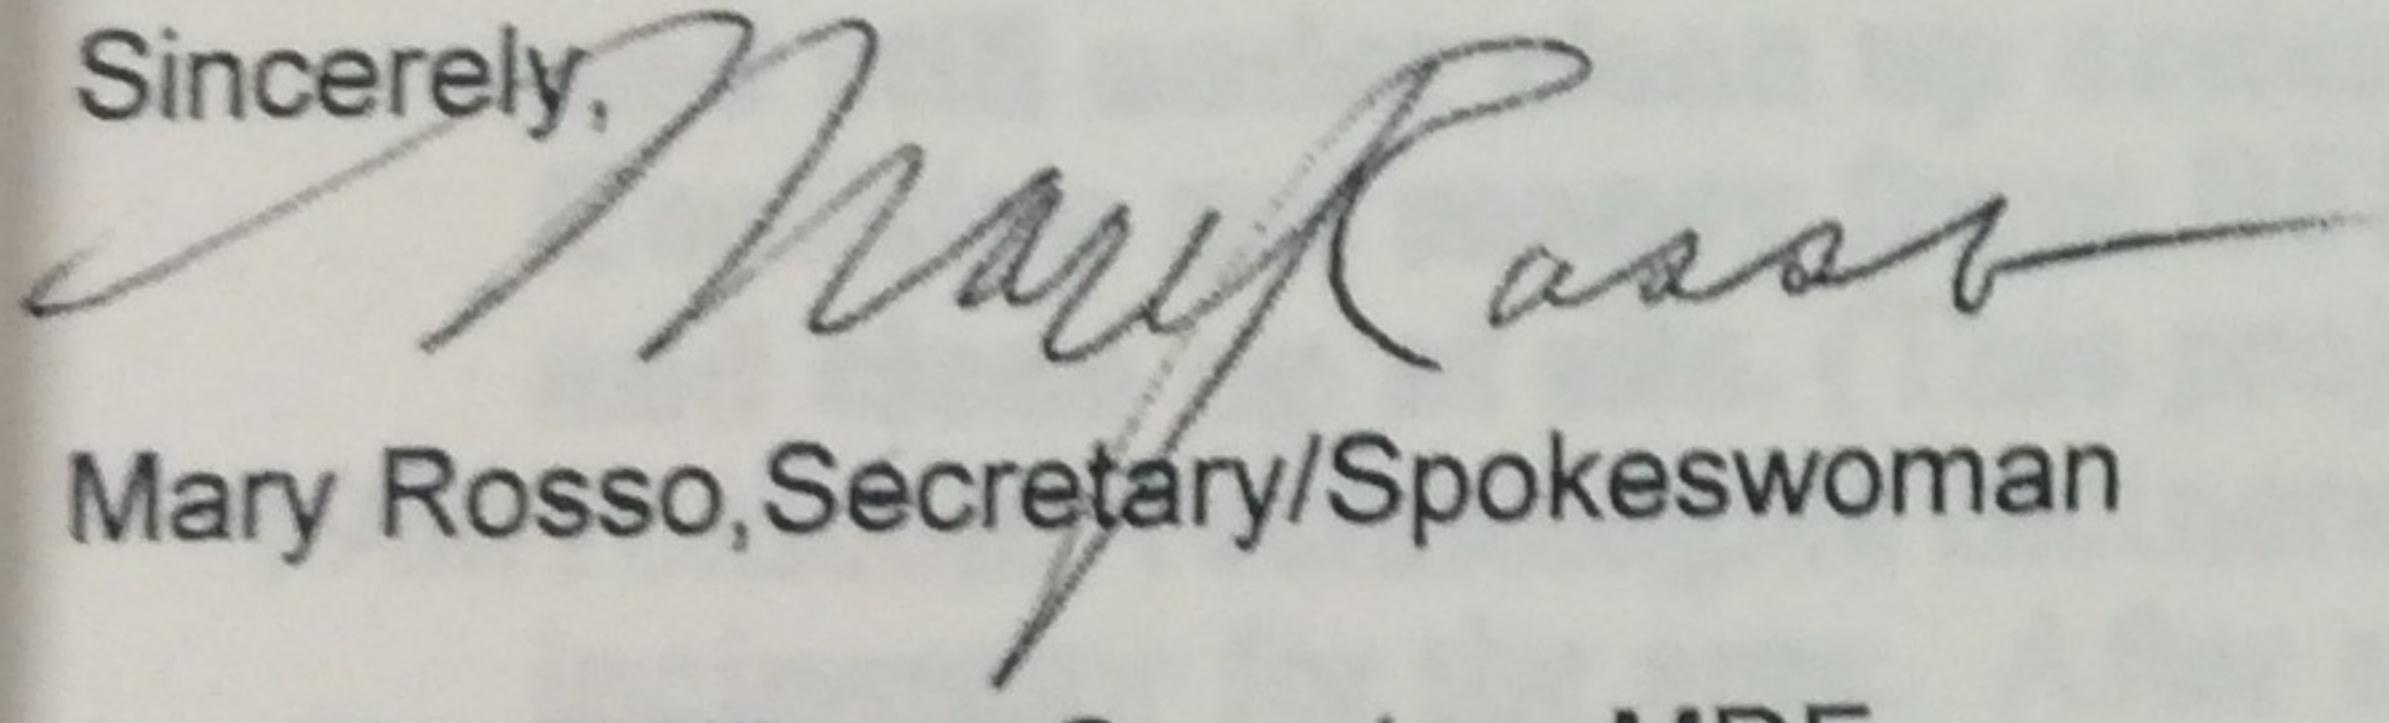

The Anne Arundel County Council for the Environment Inc. is deeply concerned about MDE's decision to facilitate the permit process for the fly ash landfill proposed by Millennium and Constellation Properties.

We have attended MDE's first informational meeting held recently in Curtis Bay. We had to send a special request to MDE to get this meeting in a place that Anne Arundel County residents could attend as well as Baltimore City. The site for the Fly Ash landfill borders Anne Arundel County. The existing unused portion of the Millennium landfill is where Constellation wants to site this fly ash 210 ft landfill..

What concerns us is the fact that fly ash has been known to contaminate wells, and waterways. EPA is considering classifying fly ash as a hazardous waste material that will need hazardous waste controls. Mr. Dexter, was asked why MDE cannot wait until EPA finalizes their decision on the fly ash.

We respectfully request you contact the necessary MDE officials to hold off on processing this permit until the decision from EPA is finalized. EPA has said they will be making that decision by the end of this year,

Sincerely,

Mary Rosso, Secretary/Spokeswoman

Cc::Shari Wilson, Secretary,MDE
